SUMMARY

IT support professional with hands-on Level I/II experience across enterprise Windows environments, Microsoft 365, and network infrastructure. CompTIA A+ and CCNA certified, with a strong foundation in Active Directory, Entra ID, endpoint management, and DNS/DHCP administration. Known for clear communication, methodical troubleshooting, and thorough documentation, with a focus on reducing repeat incidents through process improvement.

TECHNICAL SKILLS

Operating Systems: Windows 10/11, Windows Server 2019/2022, Linux (Debian)

Microsoft Cloud & Identity: Microsoft 365 Administration, Exchange Online, SharePoint Online, Teams, OneDrive, Entra ID (Azure AD), MFA, Conditional Access, Intune

Networking: TCP/IP, DNS, DHCP, VLANs, VPNs, OSPF, BGP, Switching, Wireless Networking, Firewalls, Troubleshooting

Infrastructure & Servers: Active Directory, Group Policy, DHCP Automation (PowerShell), DNS Migration, Windows Server Administration, Proxmox, NFS

Security: Endpoint Protection, AD Security Hardening, Vulnerability Remediation, LDAP Signing, Network Monitoring

Support & ITSM: Incident/Service Request Handling, Escalation Management, Ticket Documentation, Onboarding/Offboarding, Asset Management, Zoho Desk, ServiceNow (familiar)

Tools: PowerShell, PuTTY, SSH, RDP, Wireshark, Nmap, Metasploit (academic), Git

PROFESSIONAL EXPERIENCE

Freelance IT Support Technician

December 2024 - Present

Medicine Hat, AB

- Provided remote and onsite technical support for end-user hardware, peripherals, and networked devices across small business client environments.
- Diagnosed and resolved Windows OS, networking, and connectivity issues.
- Supported IP-based systems and network infrastructure, coordinating configuration changes with remote network engineers as needed.
- Performed physical installations of hardware and equipment, including POS systems, and documented technical findings and remediation actions.

IT Support Technician (Practicum)

September 2025 - April 2026

Private K-12 School - Bow Island, AB

- Delivered Level I/II support for Windows 10/11 systems in an enterprise client environment.
- Diagnosed and resolved network issues including DNS, DHCP, permissions, and wireless connectivity.
- Deployed and supported end-user devices, peripherals, and mobile equipment.

PROJECT EXPERIENCE

Enterprise Network & Identity Infrastructure

Technologies: Proxmox, pfSense, Windows Server, Active Directory

- Designed and deployed a two-site segmented network with VLAN isolation across four security zones, inter-VLAN firewall policy, site-to-site IPsec VPN, and OSPF dynamic routing.
- Deployed and hardened a multi-site Active Directory environment including an RODC branch domain controller, GPO security baselines, and DNS integration, improving the security benchmark score from 84% to 92%.

Threat Detection & Intelligence Lab

Technologies: Wazuh, T-Pot

- Built a SIEM-based detection pipeline ingesting firewall, AD, and endpoint logs; simulated brute-force, port scan, and malware beacon attacks with incident response write-ups for each.
- Operated an internet-facing honeypot for 2+ weeks and published a threat intelligence report analyzing attacker geography, targeted ports, and credential patterns.

EDUCATION

Medicine Hat College

Graduated April 2026

Information Technology: Network and Systems Administration (GPA: 3.7 / 4.0)

- Relevant Coursework: Networking Fundamentals, Systems Administration, Windows Server, Cybersecurity Principles.

Medicine Hat College

Graduated April 2024

Information Technology: Software and Internet Development (GPA: 3.8 / 4.0)

- Relevant Coursework: C#, JavaScript, SQL, Software Development Lifecycle, Web Development, APIs.

CERTIFICATIONS

CompTIA A+ | Cisco Certified Network Associate (CCNA 200-301) - July 2026
