SUMMARY

IT support professional with hands-on experience delivering Level I/II technical support across enterprise Windows environments, Microsoft 365, and network infrastructure. CompTIA A+ and CCNA certified with a strong foundation in Active Directory, Entra ID, endpoint management, DNS, DHCP, and user lifecycle support. Known for clear client communication, methodical troubleshooting, and thorough documentation. Committed to resolving issues efficiently and reducing repeat incidents through process improvement.

TECHNICAL SKILLS

Operating Systems: Windows 10/11, Windows Server 2019/2022, Linux (Debian)

Microsoft Cloud and Identity: Microsoft 365 Administration, Exchange Online, SharePoint Online, Teams, OneDrive, Microsoft Entra ID (Azure AD), MFA, Conditional Access, Microsoft Intune (Endpoint Manager)

Networking: TCP/IP, DNS, DHCP, VLANs, VPNs, Routing (OSPF, BGP), Switching, Wireless Networking, Firewall Concepts, Network Troubleshooting

Infrastructure and Servers: Active Directory, Group Policy, DHCP Automation (PowerShell), DNS Migration, Windows Server Administration, Proxmox Virtualization, NFS

Security: Endpoint Protection, AD Security Hardening, Vulnerability Remediation, LDAP Signing, Network Monitoring

Support and ITSM: Incident and Service Request Handling, Ticket Documentation, Escalation Management, Knowledge Base Maintenance, Onboarding and Offboarding, Asset Management, Zoho Desk, ServiceNow (familiar)

Tools and Utilities: PowerShell, PuTTY, SSH, Remote Desktop (RDP), Wireshark, Nmap, Metasploit (academic), Git

PROFESSIONAL EXPERIENCE

Great River Financial Services Inc. (Freelance)

December 2024 – Present

IT Support Technician

Medicine Hat, AB

- Provided remote and onsite technical support for end-user hardware, peripherals, and networked devices across small business client environments.
- Diagnosed and resolved Windows OS, networking, and connectivity issues.
- Supported IP-based systems, servers, and network infrastructure with secure configurations. Performed site surveys and documented technical findings, risks, and remediation actions.

Medicine Hat College

September 2025 – April 2026

IT Support Technician / Practicum

Medicine Hat, AB

- Delivered Level I/II technical support for Windows 10/11 systems in an enterprise client environment.
- Diagnosed and resolved network issues including DNS, DHCP, permissions, and wireless connectivity.
- Deployed, configured, and supported end-user devices, peripherals, and mobile equipment.
- Contributed to Active Directory administration including user account management, Group Policy, and onboarding and offboarding workflows.

PROJECT EXPERIENCE

ALT4.local – Enterprise IT Capstone Project

Technologies: Windows Server 2022, Active Directory, Semperis DSP, Group Policy, AppLocker, PowerShell, DHCP, DNS, RODC

- Hardened Active Directory with Semperis DSP, remediating key vulnerabilities and improving the security score from 84% to 92%.
- Migrated DNS from Windows Server 2012 R2 to 2022 with zero downtime.
- Automated DHCP configuration backups using PowerShell and scheduled tasks for disaster recovery.
- Deployed a Read-Only Domain Controller (RODC) and enforced GPO and AppLocker policies.
- Automated bulk Active Directory user provisioning from CSV files using PowerShell.

Mini Enterprise Home Lab

Technologies: Windows Server, Active Directory, DNS, DHCP, Group Policy

- Designed and deployed a Windows Server domain environment with Active Directory, DNS, and DHCP.
- Configured and managed users, groups, permissions, and Group Policy in an enterprise-style setup.
- Troubleshoot authentication, DNS resolution, and client connectivity issues across domain-joined systems.

Pi-hole Network-Wide Ad Blocker & DNS Server - <https://github.com/richard-gits-it/pi-hole>

Technologies: Pi-hole, Proxmox LXC, DNS, DHCP Integration, Linux (Debian)

- Deployed Pi-hole DNS server in Proxmox LXC container providing network-wide ad blocking for all connected devices.

-
- Configured router DHCP integration to automatically distribute Pi-hole DNS to clients without per-device configuration.
 - Implemented 300,000+ domain blocklists targeting malware, phishing, tracking, and telemetry for enhanced security.

Cloud Honeypot Monitoring Lab (OCI)

Technologies: Oracle Cloud Infrastructure (OCI), Linux, SSH, Cloud Networking, Security Monitoring

- Deployed a cloud-based Linux honeypot on Oracle Cloud Infrastructure to observe unauthorized access attempts.
- Monitored SSH authentication activity and network traffic to identify brute-force and reconnaissance behavior.
- Analyzed attacker patterns and documented findings to understand common cloud-based threats.

EDUCATION

Medicine Hat College

Graduated April 2026

Information Technology: Network and Systems Administration (GPA: 3.7 / 4.0)

- Relevant Coursework: Networking Fundamentals, Systems Administration, Windows Server, Cybersecurity Principles.

CERTIFICATIONS

CompTIA A+, Cisco CCNA 200-301
